

Day 5

1. Alert ASCII Code of any key pressed and detect whether it is alt key or ctrl key or shift key

2. Prevent context menu from being displayed by preventing from mouse right click from its action.

Note:

context menu is the menu displayed when mouse right button is Clicked (oncontextmenu)

3. Create a simple form that on submit display confirmation message and according to user action it will either stop submission from proceeding or it will continue form submission. Make your own custom event "timeout" that fires after 30 seconds if the user hasn't entered any data.
(onSubmit)
